Psychology Major, BA

Student Learning Outcomes

Students will:

• develop conceptual frameworks that embrace information representing the breadth and depth of the discipline and profession of psychology;

• develop basic skills in learning, critical thinking and reasoning;

• expand and pursue curiosity about human behavior and experience;

• engage in critical thinking about human behavior and experience, think carefully about issues before coming to conclusions and recognize that many problems have more than one solution;

• recognize well-founded theories, research designs, psychological phenomena and conclusions;

• think critically about self and have awareness of similarities and differences with others, such as differences in gender, race, ethnicity, culture and class.
