School Psychology, MS

Student Learning Outcomes

Students will:

• know the laws and procedures governing school psychology practice, know general principles of measurement, have skill in the precise administration of specific measurement instruments and understand educational systems and the role of the school psychologist within these systems;

• understand a problem-solving model and use the model effectively to gather information for the purpose of making decisions in a multi-dimensional matrix that includes the individual student and the student’s interactions with environments that establish and maintain academic and social behaviors.
